she did it too!

Rosie the Riveter is a cultural icon of the United States that represented the women who went to work during WWII to do men's job.

I also found out that it was the character who inspired Beth Miles of (**ses petites mains**) when she designed her darling **annie e. denim** overall for little girls.

I like the idea of a fictional character being brought to life and in such a subtle way that only the happy few know about it.

Besides, I'm always curious to hear where designers get their inspiration from ; it tells you much more about them and their style than a full biography would.
